

Creating a Community Concept Map for Valrico

Open House 1

The **concept map** is a visual representation of selected Goals and Strategies within your community plan. It also strengthens connections to current and planned community assets. The following exercises will gather input to help create the concept map for the **Valrico Community Plan**.

Community Boundaries Exercise

In this exercise, focus on the boundaries of your community, to the fullest extent. What areas do you consider to be Valrico?

Using the markers, please identify the following:

1. Areas not currently included, but you feel should be within the Community Plan boundaries.
2. Your community's neighborhoods and their boundaries.

Community Assets Exercise

Community assets can be parks, schools, and libraries. They can also be places of employment, where you go shopping, or otherwise visit. **In this exercise**, focus on how you travel to those destinations in your community.

Using the markers, please identify the following:

1. Circle three (3) places you travel to on a *weekly* basis. Please label them if they are not already labeled.
2. Highlight the major/main roads you travel on to get to those places and if you travel by a means other than a car, please indicate this.
